

Key Operational and Strategic Changes Document

This document summarises key operational and strategic changes to the Global Motor Manufacturers Australia IT environment for the upcoming year.

1. Finance

- o Consolidation of unnecessary costs
- o 4 offices shut down with occupants joining remaining offices
- o Following cloud POC, migration of entire environment to cloud postponed for a year due to implementation costs

2. Governance

- o Implement Relationship Governance Forum
- o Removal of Account Architect due to reduced number of projects expected in FY19/20

3. Applications

- o Increasing number of toolsets
- o Focus on COTS (Commercial Off-The-Shelf) tools to replace functions of existing tools
- o Bring development of applications in-house rather than outsourcing

4. Infrastructure

- o Network capacity upgrade planned for half the locations in September and the other half in December
- o 50% of servers are currently out of support but it has been decided that they will not be replaced in the coming year

5. Security

- o Implemented Privileged Access Management within existing AD environment

6. End User Services

- o Reduced number of employee laptop types from 15 to 12 (12 standard operating environments)
